

“I recently purchased a Zion frame and built it to become my dream bike. A very comfortable frame and the best hardtail I have ever owned. My full suspension bike doesn't visit the trails as much as it used to because I'm always riding my Van Nicholas”

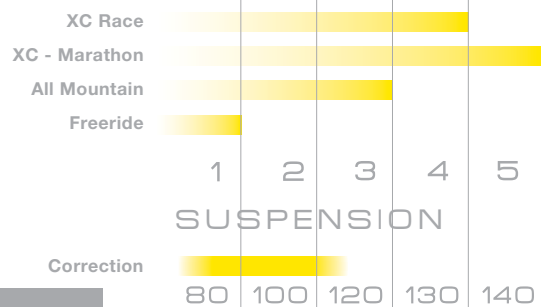

N. Carels – VN Fan

Design: The Zion geometry has been designed to deal with a variety of off-road riding and is incredibly comfortable. The Zion is capable of taking forks with 100mm 'give'. A suite of braze-ons allows for any kind of braking system you prefer, including disc brakes, and means the Zion will easily cope with touring.

Usage: The workhorse of the Van Nicholas Titanium hardtail stable; the Zion maintains our high standards of impeccable craftsmanship and great value. The frame incorporates integrated options for disc or V-brakes, classic Van Nicholas geometry, size specific 3Al/2.5V seamless Titanium tubing, and our acclaimed hand-brushed finish. It's an all-action, do-anything-to-it frame on and off-road.
